

**FOR IMMEDIATE RELEASE**

## **Discflo Pumps: Revolutionizing Fluid Handling for the Meat, Poultry, Egg, and Animal Food Industry**

**San Diego, CA (January 2, 2025)** — The animal agriculture industry presents a range of unique challenges when it comes to pumping solutions. From preserving the integrity of delicate products to reducing costly downtime and maintaining stringent sanitary conditions, manufacturers face ever-increasing demands. [Discflo Pumps](#) provides innovative solutions tailored to meet these needs, ensuring reliability and efficiency in every application. [International Production & Processing Expo](#) attendees can visit Discflo at booth [C18196](#) to experience the innovative technology that has redefined fluid handling in challenging industries.

Discflo Pumps stand out as a preferred choice for leading companies like Tyson Foods, Kraft, Frito-Lay, Heinz, Anheuser Busch, and Coca-Cola. Our pumps excel in the most challenging scenarios, offering superior abrasion resistance, non-impingement pumping, and smooth laminar flow.

"Our pumps are designed to solve the toughest challenges in the production and processing of eggs, meat, and poultry. By reducing downtime, preventing product loss, and extending system lifespans, Discflo delivers unmatched value to our customers," said Nick Ruiz, Discflo's Vice President of Business Development. "We're proud to partner with industry leaders to ensure smooth operations and significant cost savings."

By addressing the excessive wear, constant clogging, and product loss that plague traditional pump systems, Discflo's cutting-edge technology reduces maintenance and repair costs by up to 90%.

Discflo's unique [Discpac Technology](#) harnesses boundary layer and viscous drag principles, providing unparalleled performance compared to traditional centrifugal and positive displacement pumps. Our solutions handle fluids of all kinds, from animal blood and bones to shear-sensitive eggs and egg whites, ensuring reduced downtime, improved productivity, minimize product loss, and extended system lifespan.

Discflo Pumps will be showcasing their innovative solutions at booth C18196 during IPPE 2025, featuring live demonstrations that highlight how their technology enhances efficiency, minimizes downtime, and improves product quality.

### **About Discflo Pumps**

Discflo has been at the forefront of fluid-handling innovation for over four decades. Our pumps are trusted worldwide for their durability, efficiency, and ability to handle even the toughest applications. Whether you're transferring delicate fruit mixtures or processing abrasive animal

fats, Discflo Pumps are engineered to outperform and outlast the competition. For more information, visit [www.discflo.com](http://www.discflo.com) or contact [sales@discflo.com](mailto:sales@discflo.com).
