### **Discflo Pumps: Proven Success in Food & Beverage Applications**

**San Diego, CA (January 9, 2025)** — Discflo Corporation has solidified its reputation as the go-to provider for innovative pump solutions in the food and beverage industry, delivering superior performance where conventional systems fall short. Industry leaders trust Discflo for their toughest pumping challenges; successes include:

- **Tyson Foods:** Streamlined hot tallow mixture transfer, achieving annual savings of \$91,000.
- **Welch's Juice:** Resolved clogging issues during grape and vine trimmings transfer.
- **National Egg Products:** Enabled smooth pumping of egg whites, eliminating foaming and abrasive wear.

Discflo Pumps excel in a wide range of applications, including fluid and semi-fluid transfer, mixing and blending, as well as for precise dosing and container filling. They provide reliable performance in fermentation and brewing processes, making them a versatile and essential solution for diverse industrial needs.

"Discflo's state-of-the-art pump technology is engineered to meet the most demanding food processing applications. Our sanitary, 3A/USDA-certified SP and MIS Series pumps, available in CIP and SIP configurations, deliver exceptional reliability and hygiene," says Discflo's VP of Business Development, Nick Ruiz. "With customizable metallurgy options, we ensure our solutions align with the unique operational needs of every customer."

Discflo's revolutionary disc pump technology is specifically designed to tackle the toughest challenges in the food and beverage industry. By dramatically reducing maintenance costs, these pumps are built to last longer and require fewer repairs, ensuring consistent reliability. Their non-clogging and durable design virtually eliminates issues like clogging, cavitation, and excessive wear, even in the most demanding applications. Additionally, the smooth, laminar flow created by Discflo pumps preserves product integrity, preventing damage to delicate or shear-sensitive materials while maintaining optimal performance.

"Our pumps redefine what's possible in fluid transfer and food processing. Whether handling high-viscosity syrups, abrasive slurries, or delicate raw food mixtures, Discflo provides unmatched efficiency and product integrity," says Discflo's CEO, Xochitl Ruiz. "We take pride in offering innovative solutions that help our clients maintain quality while improving operational performance."
