PROEX FOOD Vibratory Conveyors Uniquely Hygienic & Energy Efficient

[MENONONEE FALLS, WI]: PROEX FOOD announces its updated line of vibratory shaker conveyors, best-in-class hygienic and efficient vibratory conveyors. These vibratory shaker conveyors offer a better way for processors to transport, meter, distribute, grade, glaze and generally improve several important operations in a processing and packaging line. There are also cluster busters and multihead weigh system feeders for IQF processors.

“Our vibratory conveyors are the best solution a processor can buy, to maintain necessary hygiene levels while simplifying maintenance,” says Daniel Ghadiri, President and CTO at PROEX FOOD. “We offer best-in-class robust 23Hz conveyors and distribution systems, with ultra-efficient IP69 rated electromagnetic drives.

Features and benefits of PROEX FOOD Vibratory Conveyors include.

- Hygienically designed shaker pans
- Washdown IP69 rated electromagnetic drives
- Antimicrobial-treated, long-strand reaction springs
- Standard and custom designs
- Near zero maintenance
- Low energy utilization
