

**FOR IMMEDIATE RELEASE**

**Arkion Life Sciences Provides Revolutionary EgCel IgY Technology: A Unique Multivalent Health Intervention for Immune Health in Livestock**

New Castle, 1/2/2024 – Arkion<sup>®</sup> Life Sciences, an up-and-coming disruptor in the field of biosciences providing innovative and natural solutions, is proud to announce the development of EgCel<sup>®</sup> IgY Technology, a groundbreaking advancement in the science of egg antibodies for greater immune health in livestock. This cutting-edge technology represents a significant leap forward in the field of nutritional supplements, offering a new standard in immune support and gut health.

EgCel IgY Technology is a proprietary egg-based health intervention developed by Arkion Life Sciences, leveraging the power of Immunoglobulin Y (IgY) derived from egg yolk. Immunoglobulins are essential antibodies that play a crucial role in supporting the body's immune system. Through a meticulous vaccination process, Arkion Life Sciences has harnessed the potent immune-boosting properties of IgY to create EgCel IgY Technology products which each offer unique, multivalent support: EggTek<sup>®</sup>-C for cattle (and other ruminants), EggTek-S for swine, EggTek-P for poultry and ActivEgg<sup>®</sup> for companion animals and equine.

Key features and benefits of EgCel IgY Technology include:

1. **Immune System Support:** EgCel IgY Technology is designed to enhance the body's natural defenses, providing comprehensive support for a robust immune system.
2. **Holistic Wellness:** The technology offers a holistic approach to wellness by promoting a balanced and resilient immune response, helping individual animals to maintain optimal health.
3. **Bioavailability:** EgCel IgY Technology ensures high bioavailability of important immunoglobulins to maximize the benefits for each species.
4. **Scientifically Proven:** Backed by rigorous research and development, EgCel IgY Technology products have undergone rigorous testing to validate its effectiveness and safety.

Dr. Shawn Jones, PhD, Production and Process Manager at Arkion Life Sciences, commented on the new developments, saying, "Products derived from our EgCel IgY Technology platform represent significant breakthroughs in animal immune health. We are excited to introduce products that not only draw on the power of nature but have also been meticulously crafted through scientific innovation, research, and expertise. Our commitment to advancing animal well-being is at the core of this development providing another tool to producers in need of alternative solutions to antibiotic use."

Arkion Life Sciences is dedicated to delivering products that meet the highest standards of quality and efficacy. EgCel IgY Technology products align with the company's mission to provide innovative natural solutions for improving health and wellness.
