

## Discover the Power of AI for Poultry Farmers Today!

January 2024; In a world where affordable protein is in high demand, the Vencomatic Group firmly believes in the potential of AI technology to revolutionize poultry farming. We understand the importance of animal welfare, sustainability, and economic success in this industry. That's why we are dedicated to helping poultry farmers unlock the full genetic potential of their birds, flocks, and farms.

But this isn't just a vision for the future - it's happening right now. By combining state-of-the-art hardware with data and predictive AI technologies, we are already witnessing incredible results. From proactive management to early disease detection, our Meggsius technologies are already helping farmers today. As we continue to enhance the AI algorithms, the impact will for sure be even more significant tomorrow.

### Egg volume (weight) detection

- 31-1: Decrease detected by farmer and calls veterinarian
- 1-2: Vet diagnoses Clostridium infection

### With data analysis from Meggsius:

- 28-1: Data already shows slight deviation in egg volume
- 25-1: Other indicators in the data show even earlier signs

**6 days before diagnosis of veterinarian!**

The benefits are numerous. Farm owners and specialists can reduce their workload and focus on what matters most, while also saving valuable time and resources. Moreover, this integrated approach allows for a more autonomous and efficient system, reducing reliance on scarce and expensive labor.

By capturing data through our [Meggsius solutions](#), we enable farmers to steer their production towards excellence. From improved egg quality to healthier birds, the possibilities are endless. Our technology even detects issues in real-time, such as obstructions or cold areas, which would otherwise go unnoticed.

During the **IPPE TECH Talks**, our expert, Dennis Hoeks will discuss the aspects of this technology and demonstrate how it impacts on daily operations.

### **IPPE TECH Talks**

Tuesday, 1/30/24

Time: 2:00:00 PM

Theater: B Hall, Booth B48027

Come and meet us at the Vencomatic Group **booth B23005** during one of the show days and we happily demonstrate to you how our Meggsius data enabled solutions can already help you now!

## Company Profile

At Vencomatic Group, we are on a mission to make poultry husbandry sustainable. We seek to balance the operation of a successful business with the lowest possible environmental impact, all while trying to achieve the highest animal welfare levels. **We always, develop our products based on a thorough understanding of the bird, her well-being, and her eggs.**

Our unique solutions are supporting the entire ‘Egg Way’ for layers, breeders, broilers, and hatcheries. Think of poultry housing equipment ([Vencomatic](#), [Van Gent](#)), egg collection and handling equipment ([Prinzen](#)), and climate solutions ([Agro Supply](#)). And we don’t stop there, discover how [Megg-sius](#) powers precision farming and gives us the opportunity to help our customers even further, reaching the maximum potential out of every bird, every flock every farm.
