FOR IMMEDIATE RELEASE – 1/22/2025

Double L's Ecotight Tunnel Door: A Robust Solution for Superior Temperature Control

Double L Group, a renowned leader in agricultural solutions, is thrilled to announce the launch of its latest innovation, the Ecotight Tunnel Door. Designed to enhance ventilation efficiency in poultry facilities, the Ecotight Tunnel Door combines advanced insulation with a user-friendly design, delivering unmatched energy savings and improved bird welfare.

The Ecotight Tunnel Door is engineered to address the specific needs of modern poultry producers, offering a robust and efficient solution for maintaining optimal environmental conditions within poultry houses. By preventing air leakage and ensuring better temperature control, this innovative product helps reduce energy costs while promoting healthier living conditions for birds.

Key Features:

- **R-10 Insulation Value:** The Ecotight Tunnel Door boasts an exceptional insulation rating, minimizing heat loss and reducing energy consumption, making it an ideal choice for poultry houses in various climates.
- **Durable Construction:** Made from high-quality, durable materials, the door is designed to withstand the rigorous demands of poultry operations, ensuring long-term performance and reliability.
- **Customizable Sizes:** The tunnel door is available in various sizes to fit the specific needs of different facilities, providing flexibility and ease of integration.
- **Continuous Hinge Design:** This unique feature provides a secure seal, preventing cold-air leakage and improving the overall efficiency of the ventilation system.

"Our Ecotight Tunnel Door is a game-changer for poultry producers seeking to improve energy efficiency and environmental control," said Garrett Bradford, Poultry Sales Manager at Double L Group. "By delivering superior insulation and a tight seal, this product helps maintain optimal temperatures, reducing energy costs and enhancing bird comfort."
