

## For Immediate Release

### EcoTight Tunnel Door: Pioneering Agricultural Energy Efficiency

*The innovative EcoTight Tunnel Door by Double L, exemplifying advanced energy efficiency in agriculture.*

**Atlanta, GA- January 30<sup>th</sup>, 2024-** Double L, a visionary in agricultural solutions, proudly introduces the EcoTight Tunnel Door at the International Processing & Production Expo. This revolutionary product is destined to transform energy management in agricultural buildings, presenting a novel solution for growers globally.

#### Elevating Agricultural Standards

The EcoTight Tunnel Door represents a leap in agricultural technology. With its impressive close cell foam insulation, it guarantees exceptional temperature control, leading to significant energy savings and reduced operational expenses. Tailored to fit various poultry houses with the five-foot-tall or four-foot-tall models.

Double L has long been a pioneer in the agricultural industry, dedicated to developing innovations that benefit growers. The EcoTight Tunnel Door is a result of this dedication, setting a new standard in energy efficiency and durability.

#### Innovation Meets Practicality

Key Features of the EcoTight Tunnel Door:

- Superior Foam Insulation: Maximizes energy conservation, reducing heating and cooling costs.
- Robust PVC Design: Offers greater durability than traditional fiberglass or metal doors.
- Streamlined Sealing Process: Enabled by a continuous hinge and ratchet strap design.

Trinity Persful, President of Double L, comments on the launch: "The EcoTight Tunnel Door is not just an innovative addition to our product line; it represents a major stride in sustainable agriculture. This door is crucial for growers who aim to enhance energy efficiency and reduce operational costs. It embodies our commitment to leading the agricultural industry towards a more efficient, sustainable future."

#### Transformative Agricultural Solutions

The EcoTight Tunnel Door is a game-changer in the agricultural sector. Its unique features, such as the seamless installation process and adjustable design, distinguish it in the market.

This product launch marks the beginning of a new era in energy-efficient and cost-effective agricultural solutions. The EcoTight Tunnel Door is set to become an integral part of modern chicken houses, significantly contributing to eco-friendly growing practices.
