## FOR IMMEDIATE RELEASE

### PathO<sub>3</sub>Gen Solutions to Showcase Advanced Shoe Disinfection Technology at the International Production & Processing Expo (IPPE) 2025

[Tampa, FL – January 23, 2025] – PathO<sub>3</sub>Gen Solutions, a leader in disinfection technology, will participate in the International Production & Processing Expo (IPPE) 2025, held in Atlanta, Georgia, from January 28-30. PathO<sub>3</sub>Gen Solutions will showcase its patented shoe disinfection technology, combining ozone and UV-C as an ideal sanitation enhancement,

Footwear cross-contamination poses challenges in high-risk environments. PathO<sub>3</sub>Gen's UVZone eliminates up to 99.999% of pathogens from shoe soles in seconds. UVZone is ideal for biosecurity from farm to processing for its efficacy, ease of use, low-maintenance, and sustainable nature.

Christi Tucker, Quality Assurance Manager at Lone Star Dairy Products in Texas says, *"We have been utilizing UVZone shoe sanitizing technology from PathO3Gen since October 2020. The dairy industry is highly regulated. This technology has helped us to achieve "proactive clean" in our facility. We have been quite pleased with our audit results as well as the support we have received from the PathO<sub>3</sub>Gen Solutions team."*

"We're excited to exhibit at IPPE 2025 and share how our technology can improve your operation," said Scott Beal, COO at PathO<sub>3</sub>Gen Solutions. *"Our UVZone Shoe Sanitizing Stations provide a critical layer of protection against threats like Influenza A, E. coli, Salmonella, and Listeria, supporting robust safety protocols."*

Because the shoe disinfection stations integrate seamlessly into workflows with a more practical and streamline method of perimeter protection than traditional methods, they are gaining rapid adoption by leaders in the food processing, biotech, pharmaceutical, and healthcare sectors.

Visitors to PathO<sub>3</sub>Gen's booth B46012 can experience live demonstrations of the technology. Additionally, the company will host a **TECH Talk: Biosecurity for Your Perimeter and Critical Areas: Innovative Intervention for a Safer Product and More Sustainable Operation** on Tuesday 28th, 2pm in **B Hall, Booth B51033**.

PathO<sub>3</sub>Gen is excited to announce our 3rd year at IPPE showcasing an important innovation that will help shape food production and processing's future.
