

December 5, 2023

Ruan is one of the largest privately-owned, asset-based 3PLs in the United States. We proudly provide Dedicated Contract Transportation, Managed Transportation, Value-Added Warehousing, and Brokerage Support Services to a variety of partners across the nation who serve different industries, including Food and Beverage, Chemicals and Gases, Bulk Food Grade and Dairy, Retail, and more.

Moreover, we provide exceptional service to valued customers in the egg and animal health industries. One of our enduring partnerships is with **Novus International, Inc.**, the leader in intelligent nutrition for the animal agriculture industry. Ruan became an extension of this team by providing Dedicated Contract Transportation services to deliver Novus' ALIMET® Feed Additive efficiently, safely, and on time.

“Ruan was recently selected as our new bulk transport partner to serve as our dedicated logistics provider for ALIMET® Feed Additive in the U.S. and Canada. We selected Ruan to help elevate our service to our customers. Ruan has an extensive pool of tanker-endorsed drivers and offers improved technology that will enable us to provide even more reliable and timely service to our customers,” said Kristopher T. Helling, Associate Director, Global Logistics at Novus International, Inc.

Ruan is excited to be attending the International Production and Processing Expo on January 30-February 1! We would love to speak with you and discuss how we can help your organization achieve similar results. Come visit us at booth number B26002. If you would like to schedule a private meeting with the Ruan team at IPPE in advance, please email Roger Mason at rmason@ruan.com.
