

CleanAccess is a Polish manufacturer of equipment for cleaning systems for food factories and more. Although the company started its operations in 2015, thanks to the commitment and experience of employees and high-quality products, it already has customers in over 40 countries around the world!

We are a company with a modern machine park, maintaining ISO 9001 Quality Management standards. The high quality of products and services as well as safety in the production hall are due to the implemented 5S and Visual Lean Management systems and the Kanban system.

CleanAccess has its own design department consisting of high-class specialists - thanks to this, we are able to provide the customer with a full range of services, ranging from audits and solving problems with the use of existing systems and assistance in the selection of new devices, including projects, to the delivery and servicing of these devices. Thanks to the developed R&D and Quality Assurance departments, we have an impact on every stage of the production process, the ultimate goal of which is to provide customers with the highest quality innovative products.

The CleanAccess team consists of a group of people with vast experience in the field of hygiene and safety of food production, whose goal is to create innovative solutions and products and educate in the field of food safety, significantly affecting the increase in hygiene standards in the food industry.

The company offers the highest quality washing and foaming satellites, central units and chemical dosing stations, antimicrobial hygienic hoses, guns and valves, lances and connectors, safe hangers - for medium and low pressure washing systems.

Thanks to our flexibility, we are able to adapt to the needs of large international corporations as well as medium and small enterprises, as well as standards and regulations applicable on various markets.
