SLC

Scale Labeling Control

Computerway Food Systems is excited to showcase the Scale Labeling Control at the Atlanta, GA IPPE 2022!

Computerway's Scale Labeling Controls (SLC) is the primary case-level weighing and labeling application for processing plants. SLCs can be networked together as part of a complete Production and Inventory System, or run stand-alone for small operations. SLC generates a unique serial record for every box, managing the range of weights, tares, descriptions

- Produce serialized case labels on demand
- Control weight limits and measure giveaway
- Generate Production Reports on the floor and office
- Control access to functions by login/permission
- Produce to Order (add-on module - complete systems)

Computerway Food Systems (CFS) is a world leader in integrated plant floor and enterprise-level information systems designed specifically for food manufacturing, processing and handling operations.

For inquiries please contact Computerway Food Systems at (336).841.7289 or email us at sales@mycfs.com.
