

Computerway Food Systems  
Booth: C12647  
IPPE 2022 Atlanta, GA  
January 25-27, 2022

Computerway Food Systems is excited to introduce a single sizing line control system at the Atlanta, GA IPPE 2022!

Wolf Solo is the single-line version of Wolf ISS, controlling a single sizing line. Wolf Solo promises the reliability and ease-of-use of the standard Wolf ISS for a lower price and is an ideal upgrade option to replace obsolete Gainco, Linco or legacy Coyote and Fox controls. This system comes with standard features

- More single line flexibility and features
- State-of-the-art Wolf technology at more affordable cost
- Improved weighing through digital scale functionality
- Capability for remote support via VPN
- Maintained access to newest technology and developments
- Ability to upgrade system with advanced functionality

Computerway Food Systems (CFS) is a world leader in integrated plant floor and enterprise-level information systems designed specifically for food manufacturing, processing and handling operations.
