Dosatron International, LLC, Introduces the New Dosatron D40MZ Series

CLEARWATER, FL - December 15, 2021 – Dosatron International, LLC, with corporate offices in Clearwater, Florida, is pleased to officially launch the New 40 GPM series of chemical injectors.

With flow rates of up to 40 GPM, this new Series is easy to install and maintain; it is also water-powered, so no electricity is needed. The most exciting feature of the new 40 GPMs is the user-friendly, metal-free piston with 63% fewer parts compared to the old style.

The Dosatron D40MZ series includes three different models, the D40MZ2 with a dilution range of 1:500 to 1:50, the D40MZ5 with a dilution range of 1:100 to 1:20, and the D40MZ3000 with dilution range of 1:3000 to 1:500. An optional bypass and union upon request are available for the three models.

“Dosatron units are used in farm water line cleaning and treatment, as well as sanitation in processing facilities. With many functionalities and uses for Dosatron, we wanted to create an injector that would require less maintenance. The D40 Series can achieve this goal with fewer parts and a simplified piston design. This, in turn, means there is an extended lifetime to these pistons and injectors,” says Dosatron CEO Pam Temko.

For more information about the D40MZ Series, please visit us in booth B7039, contact Dosatron at 1-800-523-8499, visit the Dosatron website at www.dosatronusa.com.

Dosatron International, LLC, is an industry leader in water-powered, proportional chemical injectors. Dosatron products are manufactured according to ISO 9001:2000 and ISO 14001:2004.
