For Sanitation Chemical Dosing – Look to Dilution Solutions!

Dilution Solutions provides the perfect solutions for all your sanitation needs, from water-powered chemical injectors to electric metering pumps that are easy to adjust. They allow you to fine-tune your chemical mixture for improved results and reduced waste, allowing you to meet the stringent sanitation standards for food processing plants.

The Dosatron water-powered line of non-electric chemical injectors provides a wide range of dilution rates. The D14 Series has a ¾” connection with water flows up to 14 GPM and a range of 1:3000 to 1:5. The D8R Series has a connection of 1 ½” with water flows up to 40 GPM and a range of 1:3000 to 1:20. They accurately inject:

- Chlorine
- Chlorine Dioxide
- Quat Sanitizers
- PAA
- Lactic Acid
- Alkaline Cleaners
- Acid Cleaners

The Etatron eOne MF Series is a multifunction metering pump that is highly reliable and compact. It automatically adjusts injection speed to the water flow for proportional delivery, operates with a water meter, has a PVDF solenoid head for enhanced chemical resistance, and includes a long-lasting one-piece Teflon® diaphragm design.

To learn more about our food processing equipment, stop by booth B6864 to speak with our experts, contact customer service at 1-800-451-6628, or visit the Dilution Solutions website at www.dilutionsolutions.com.

About Dilution Solutions
Dilution Solutions, a Dosatron International Inc. Company was created to provide the best installation systems and accessories available to increase the efficiency of your chemical delivery.
