Animal Drinking Water Treatment

Dilution Solutions offers a line of electric diaphragm metering pumps and water-powered chemical injectors for a variety of line treatment products such as:

- Chlorine
- Chlorine Dioxide
- PAA
- Hydrogen Peroxide

Water treatment is a snap with the Dosatron line of chemical injectors. The units are non-electric and run on the water already used in the drinker line. They are easy to adjust and compensate for changes in water pressure or flow, producing a consistent homogenous chemical mixture.

The Etatron eOne MF Series metering pumps are simple to use, highly reliable, and are not affected by water quality! The eOne MF automatically compensates injection for variations in flow when using a flow meter. Has a self-priming pump head equipped with a manual air bleed for fast priming, a PVDF solenoid head for enhanced chemical resistance, and an IP65 acid-resistant housing.

To learn more about our water treatment equipment, stop by booth B6864 to speak with our experts, contact customer service at 1-800-451-6628, or visit the Dilution Solutions website at www.dilutionsolutions.com.

About Dilution Solutions
Dilution Solutions, a Dosatron International Inc. Company was created to provide the best installation systems and accessories available to increase the efficiency of your chemical delivery.
