

# EmTech **SUPER** Fixed Rack Systems *Classic*

The Super Classic range is a fixed-rack setting system designed for high productivity and simplicity of operation and control.

The EmTech advanced air circulation system coupled with the PIR interlocking cabinet panels provides excellent thermal uniformity.

**SAME  
FOOTPRINT as  
the CM CLASSIC  
SETTER**

## Features

Capacity 100,980 eggs (165 egg flat)  
99,144 (54 egg flat)

612 Individual Tray frames installed into fixed rack frame and turning system

Can be installed on the exact same footprint as the CM Classic Setter

2 section controlled setter with 8 x fan assemblies

Each section will have 4 x fan board assemblies with on-board 1200 watt heater elements per fan

High Capacity smooth cooling coils, for maximum air flow

High capacity cooling and superb airflow design permits for operational flexibility, single or multistage

Each fan unit will have a heating capacity of 1,200 watts and 9.6kW for the machine

EmTech Eclipse controls

Fixed rack tray setting, operated by 12 x individual 24VDC actuator systems, each turning 3 x stacks

Fully insulated white food safe metal interlocking sandwich panel construction, consisting of a PIR (fire rated) insulation core, interlocking panels ensures a good air tight seal for excellent thermal insulation and cabinet strength

Optional upgrade available for the optimisation of the single stage operation (if required). The upgrade includes: cabinet seals for faster CO<sub>2</sub> concentration and machine warm up time, rear exhaust motorised dampers and the doubling of heating capacity to 19.2kW

One UltraMist® humidity system per control section. This highly efficient, low-maintenance system doesn't need a water tank or purified water to operate

2 Zone control system. Each environmentally controlled zone has 4 fan and heater assemblies and 2 sets of cooling coils

**NO MORE BLOCKED NOZZLES**
