

MULTIVAC Introduces a New Pouch Loader for Belted Chambers

Kansas City, MO (USA)/Wolfertschwenden (Germany) –

November 7, 2022 – MULTIVAC introduces a new pouch loader to provide a flexible, ergonomic, and hygienic process for packaging on belted chambers.

When packaging products on belted chamber equipment, the filling of the film pouches and the loading of the machines are often a bottleneck in the process. This work is usually carried out manually and requires labor-intensive product handling. To ensure full capacity utilization it typically has required five people on the production line: three for filling the film pouches with product and two for loading the chamber belt machine.

By using the new MULTIVAC Pouch Loader and Pouch Rack, the loading of the chamber belt machine is performed semi automatically, enabling an average of 40% cost reduction in labor required to load product. It can also eliminate the need for employees to physically lift up to 10 tons of product, when compared to the manual loading process.¹ This solution enables significant increases in efficiency and ergonomics while providing cost reductions.

As a best-in-class supplier of packaging equipment, MULTIVAC can design solutions specifically to meet your product requirements. MULTIVAC provides industry leading reliability, durability and comprehensive service that make our solutions a resilient link in every production chain.

¹ Based on a daily typical fresh meat plant output with a belted chamber machine.

About MULTIVAC

MULTIVAC is one of the leading providers worldwide of packaging solutions for food products of all types, life science, and healthcare products, as well as industrial items. The MULTIVAC portfolio covers virtually all requirements of processors and producers in terms of pack design, output, and resource efficiency. It comprises a wide range of packaging technologies, as well as automation solutions, labelers, printers, and quality control systems. The product range is rounded off with solutions upstream of the packaging process in the areas of portioning and processing, as well as bakery technology. Thanks to our extensive expertise in packaging lines, all modules can be integrated into complete solutions. This means that MULTIVAC solutions guarantee a high level of operational and process reliability, as well as efficiency. The MULTIVAC Group has approximately 6,700 employees worldwide, with some 2,300 based at its headquarters in Wolfertschwenden, Germany. With over 85 subsidiaries, the Group is represented on all continents. More than 1,000 sales advisors and service technicians throughout the world use their know-how and experience to the benefit of customers, and they ensure all installed MULTIVAC machines are utilized to their maximum capacity.
