Plasson Mexico is a branch of Plasson Israel, highly known for providing poultry and swine equipment solutions, present in the market for more than 55 years.

Established in Mexico since 2014, Plasson Mexico stands out in the Mexican market for providing complete solutions for poultry and swine farming equipment and for its great commitment to the results of its customers, through its outstanding pre and post-sale service.

In presale, the objective is to work together with the customers, in defining the project looking for the point of balance between cost and benefits, that best suit the customer. In after sales, the focus is on the installation and successful operation of the equipment. All the projects sold are supervised by our engineers in order to ensure that everything works as planned to provide the best results that the equipment can offer.

Plasson Mexico delivers the equipment from its warehouse in Queretaro. The immediate delivery is an additional strong point which guarantees satisfaction for its customers.

With the aim of providing its customers with more confidence in their businesses, Plasson begins to introduce turnkey projects in Mexico, where the entire structure of the “houses” is produced by Plasson and developed specifically for the Poultry business. The main idea is that the customer contracts with only one supplier for the construction of their farms and has the peace of mind that their project will be delivered according to the established deadlines.

There are many success stories, in which customers re-acquire Plasson Mexico equipment due to satisfaction with the service provided. Since the beginning of its activities in Mexico, the company has been growing rapidly. We are sure that this growth is achieved based on the relationships developed with our customers, where the main focus is: product quality, service and commitment to results.
