Sightline Announces New EU Headquarters

Ottawa, ON (November 7, 2019) – Sightline Process Control, Inc., a KPM Analytics company, announces today the establishment of a European office, strategically located close to London, UK, the second-most-populous urban area in the European Union.

The expansion is a direct benefit of the relationship with KPM Analytics and its global reach. Leveraging KPM’s vast network, Sightline can better serve existing European customers and expand its install base.

Sightline will benefit from shared space with fellow KPM Analytics Operating Company, Processor Sensors Corporation, a leading supplier of NIR and IR sensors and systems to Fortune 500 manufacturing companies and small, privately-held organizations in industries worldwide.

From its new European base, Sightline will offer a full line of Vision Inspection Systems, Automation Solutions, and Software Reporting & Analysis Tools, focusing on large wholesale food manufacturing operations.

Solution Highlights

- Multi-camera, full-color inspection and rejection systems,
- Fast accurate measurement of up to 100 Objects/Second,
- Customizable & rugged design to fit any environment,
- 100+ Measurements available with every system,
- Flexible, Expandable, ‘Open’ System Design with no proprietary components,
- Universal, easy to use Measura™ software suite, including Inspection, Dashboard, and Analytics,
- SQL database connects multiple systems and multiple sites for consolidated reporting,
- 3rd-party integrations such as WINSPC, Freshability, Excel, etc.

Virtually any food product can be measured using Sightline’s 2D/3D/color imaging technology, either directly during the production process (Over-Line / In-Line) or using a Benchtop Inspection System (Off-Line) and analyzed by Sightline’s robust Measura™ inspection and analytics software.

About Sightline Process Control, Inc.

Headquartered in Ottawa, Ontario, Canada with sales and service in Europe, Sightline specializes in 3D color vision technology used in inspection systems and automation solutions for process control. Sightline’s expertise in imaging techniques improves product quality, increases line productivity and reduces operating costs for food customers such as bakery, snack food, meat & poultry plus many others. www.spci.ca

About Process Sensors Corporation® (PSC)

PSC’s instrumentation provides accurate and reliable moisture and temperature measurement for quality control of manufacturing processes such as food, wood and paper products, tobacco as well as pharmaceuticals and plastics. An industry-leading supplier of NIR and IR technology, PSC is in Milford, MA, USA with sales offices in Franklin Lakes, NJ, USA; Corby, UK; and Warsaw, Poland. To learn more, visit www.processsensors.com.

About KPM Analytics

The operating companies that comprise KPM Analytics have come together because of their industry-leading application expertise in the food, agriculture, and environmental sectors. AMS Alliance, CHOPIN Technologies, Process Sensors Corporation, Unity Scientific, and most recently, Sensortech Systems Inc. & Sightline Process Control, Inc. are all recognized for deep application knowledge and superior support. The companies now stand as a strategic group with a common passion for providing solutions and solving our customer’s most challenging problems. Through this united approach, our customers big and small will be better served with a broader, more robust scientific instrumentation offering supported by a global network. Visit www.kpmanalytics.com to learn more.
