Safer Alternative to PVC Films is here

the eco-friendly way...

say yes to PE film

For Immediate Release

[Forvara® Non-PVC Meat wrapping films](#) manufactured by Specialty Polyfilms have won recognition from prestigious international trade exhibitions and prominent organisations all over the world. With the world consciously moving away from potentially unsafe films, many major corporations have decided to switch to Forvara Meat Wrap Films due to the inherent distinctive advantage the films have all among others in the category, with nations like the US, ANZ, and EU taking the lead in the transformation. Forvara Meat Wrap films have been successfully tested on renowned Auto-tray wrapping machines at the manufacturing facilities of top-tier meat industry players.

[IPPE tradeshow](#), the Biggest Meat Packaging & Processing Show, to be held from January 24th through January 26th, 2023, in Atlanta, Georgia, USA. Forvara Meat Film will be put on display at booth number **[#C12764, C and BC Hall: Meat and Poultry Processing and Packaging](#)**, for visitors to experience the game changing innovations at Specialty Polyfilms.

Specialty Polyfilms, India (January 07, 2023) – [Specialty Polyfilms'](#) Forvara Non-PVC Meat Wrap films received great attention from many forward-thinking meat producers & packers around the world. With the world moving toward safer plastics, many leaders from prestigious organisations around the world have weighed the benefits of switching to Forvara non-PVC meat films.

Marketing – Director, Shantanu Deshpande elaborated, "In order to capitalize on this opportunity, top organizations in the meat industry have started aligning their businesses to voluntarily phase out current incumbents before the regulations in their country disrupt their business activities."

2022 was a busy year for Specialty Polyfilms, thanks to the recognition received by Forvara meat films at tradeshow, which prompted inquiries from interested organizations. Forvara Meat Wrap films have inherent proprietary advantage that makes it unique as compared to others.

The following are the unique film characteristics of Forvara Meat Wrap Films:

BPA Free

Bisphenol A (BPA) free

Phthalate free

Does not contain any plasticizers (such as phthalates) and no stabilizers, chlorine content or any chemicals that are harmful to human health.

Excellent breathability

Increase the shelf life with high OTR and controlled WVTR, that allows meat to stay red and fresh for a longer period.

Resistant to extreme cold

Does not crack even at sub-zero temperatures of up to -30 °C (-22 °F).

100 % Recyclable

Polyethylene is easily recycled without releasing any harmful substances into the environment.

Optimum Cling

Allows easy overwrapping around containers made of porcelain, glass, ceramic, steel and PET, Styrofoam, fibre trays to seal food without the hassle of film entanglement. It has good film-to-film adherence, too.

Designed to run on almost all auto wrapping machines: The Forvara Meat film is successfully tested for overwrapping around PET, Styrofoam, fibre trays through automatic wrapping machines by reputed manufacturers.
