

Sterling Industrial Refrigeration is pleased to announce that Will Thielemann, P.E. has been appointed as Senior Sales Engineer to lead our Texas Branch for all Project Sales. Sterling designs, builds, and services industrial refrigeration systems including ammonia, CO₂, and Freon. Sterling's customer base includes food processors, cold storage, pharmaceuticals, and the beverage industry.

Will returns to a role in contracting after spending the last 4 years working in positions representing equipment manufacturers in our industry, notably Evapco, GEA and Hansen Technologies.

Will's previous contracting experience was working with PermaCold Engineering, as the Senior Sales Engineer for their Eastern Washington office. Will spent over 6 years at PermaCold collaborating with customers on their requirements for engineering services, major equipment purchases and PSM support in Washington, Oregon, and Idaho.

Will spent 17 years with the French fry processor Lamb Weston. Will filled a variety of roles including Corporate Project Engineer and Plant Engineering Manager. His design experience includes ammonia refrigeration and control systems, as well as steam, compressed air, and water handling systems. Will also has experience as a PSM program administrator.

We are excited to have will on our team. Come by Booth: C 11960 to meet with Will. You may also reach Will at 984-867-6952 or you may email him at: wthielemann@sterling-refrigeration.com
