

CALORMATIC[®]

Official Press Release Thursday, October 14, 2021

Sweet Manufacturing Company, located in Springfield, OH, is the manufacturer of the **CalorMatic[®] Heat Processor**.

Recently Sweet announced its latest website update, designed to give the company's customers more tools and information to guide their decisions. This new website renovation allows users to take a deeper look at what the **CalorMatic[®] Heat Processor** can provide for their operations.

"Here at Sweet Manufacturing, we are proud to showcase our products and, most importantly, our results," says Austin Parkison, Marketing Specialist at Sweet Manufacturing.

"Our goal is to provide our customers as much information as possible and give them peace of mind before purchasing. With the recent addition of the **CalorMatic[®] Test Site** here in Springfield, OH, we have positioned ourselves to test various products while recording the results to showcase on our new online **CalorMatic[®] Test Library**."

What's New?

New tools and information aim to increase the understanding of the many benefits that the CalorMatic[®] Heat Processor provides in a wide variety of applications and industries. Benefits have been seen in feed mills, soy oil mills, seed processing plants, biomass, eggshell and, oyster shell drying for calcium production.
