

## Tapco Inc. Introduces NEW Patented CCLP-XD

Tapco's latest innovation, **CCHD-LP (Heavy Duty)** low profile patented\* elevator buckets, are now available in 15 sizes from 12x7 to 24x10. Buckets are made of non-corrosive, high-density polyethylene. All sizes also available in super-tough nylon and high-abrasion-resistant urethane. Ears help prevent spillage and allow more capacity above water level. Buckets fit on standard and/or low-profile spacing. Low profile for closer spacing improves output. Tapco **CCXD-LP** (Xtreme Duty) low profile elevator bucket style also available.

Tapco stocks over 1 million elevator buckets in 178 sizes, along with 15 million elevator bolts in 60 sizes. Tapco also has a large inventory of abrasion-resistant sheeting, hanger bearings, drag flights and belt splices.
