W.P. Law, Incorporated to Exhibit the Barmesa ET6-U Pump at 2020 IPPE Expo

W.P. Law, Inc. has announced that it will be participating in the world’s largest annual poultry, feed and meat technology tradeshow in Atlanta, GA. The International Production and Processing Expo will happen between January 28th and 30th at the Georgia World Congress Center.

A leading supplier of fluid handling equipment, W.P. Law, Inc. will be showcasing the Barmesa ET6-U. The self-priming, solids-handling centrifugal pump is designed for municipal and industrial applications. Similar to the Weinman-Midwhirl 6W-2511, this pump has a uniquely designed impeller, which can effectively pump large solids without clogging.

Terry Brady, W.P. Law, Inc. president says, “When we began implementing this project, we wanted to provide our customers in the poultry processing industry, a solids-handling pump that would perform well in what is a demanding application, and we wanted to offer it at a competitive price with a short lead time. Thanks to our partnership with Barmesa, we have been able to accomplish all three of our goals.”

Brady continued, “Our company was founded on the philosophy of ‘helping customers is our business.’ We still stand by that today, and we are extremely excited to unveil this new product to the marketplace.”

W.P. Law, Inc. will serve as an exclusive U.S. distributor for the Barmesa ET6-U Pump. For more information about the Barmesa ET6-U pump, visit, www.barmesaet6u.com and Booth #B8438.

Barmesa ET6-U Pump details:

- Suction and discharge size 6 inches.
- Maximum solids size 4  and ¾ inches.
- Capacities to 1,100gm, heads to 115 feet.

About W.P. Law, Inc.

W. P. Law, Inc. is a leading supplier of fluid handling products including pumps, piping, valves, control systems, and custom fabrication. Their staff can assist in the design and application of pump stations, effluent spray fields, and system automation.

About Barmesa Pumps, LLC

Barmesa Pumps LLC started operations in 1953, manufacturing small self-primer pumps, jet pumps and end suction centrifugal pumps for the rural market.

During the 1970’s, new additions were made to the line of products and Barmesa Pumps LLC started manufacturing submersible solids handling pumps as well as grinder pumps.

Today after more than 60 years, Barmesa Pumps LLC has manufacturing facilities & distribution centers across America, and an extensive distributor network. Their state-of-the-art manufacturing facilities have modern CNC machinery as well sophisticated design and test capabilities. Barmesa serves markets such as marine, commercial, municipal, wastewater, water, industrial, construction, utility, chemical, OEM, irrigation, dewatering flood control, fire protection, as well as many other applications.

The privately held family business is committed to offering an extensive variety of products with the best quality standards and on-time deliveries. They are proud to say "Quality Pumps Since 1953."
