Wire Belt Introduces Enhanced Hygienic Conveyors

LONDONDERY, NH (November 12, 2019) - Wire Belt Company of America, a manufacturing company that produces stainless steel conveyor belting and conveyors, will be highlighting their line of Enhanced Hygienic Conveyors at the International Production and Processing Expo in Atlanta, Georgia. For more than 85 years Wire Belt has been bringing solutions to difficult conveying challenges in industries as varied as food processing, electronics, and automotive. The Hygienic range of conveyors delivers the highest possible hygiene control, meeting and exceeding the guidelines set out by the EHEDG (European Hygienic Engineering & Design Group) and other advisory bodies.

Wire Belt’s Enhanced Hygienic Conveyors solve a collection of sanitary issues that food processing plants and various types of other manufacturing facilities face on a regular basis. These hygienic options are available in the Flex-Turn® Conveyor, Ladder-Flex™ spreading and converging conveyor and Straight conveyors. The purified upgrades offer solutions such as simplified wash-through construction, open section leg frames, clean-in-place, stand-off motor and bearings, high density blue plastic components, and allow no places for bacteria and allergens to hide.

Wire Belt leads the market in developing new conveyor systems that utilize the latest construction methods and technologies to meet and exceed customer requirements, best practice methods, regulations and standards. For more information on the Enhanced line of Hygienic Conveyors you can visit the website at www.wirebelt.com, or to speak with a representative please contact sales@wirebelt.com or call 603-644-2500.

Wire Belt Company of America is the leading manufacturer of open-mesh stainless steel conveyor belting. The Londonderry, NH based company is a 4th generation family owned business.
